– Proefschrift –

Ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de Rector Magnificus, dr. F. van der Woude,
in het openbaar te verdedigen op vrijdag 8 november 1996
des namiddags te 4.15 uur

door

Ilka Christine Tónczos

geboren op 16 maart 1966 te Groningen

Promotores: Prof. dr. R. J. M. de Meijer
Prof. dr. ir. H. J. de Vriend
Prof. dr. A. van der Woude
Referent: Dr. ir. J. S. Ribberink

Contents

1	Introduction and Basics	9
1.1	Preface	9
1.2	Sediment characteristics	14
1.3	Fluid mechanics	16
1.3.1	Basic equations	16
1.3.2	Waves	18
1.4	Sediment transport	20
1.4.1	Bottom shear stress	20
1.4.2	Sediment transport models	23
1.4.3	Selective transport	26
1.4.4	Heavy mineral placers	28
1.5	Gamma radiation and its detection	30
1.5.1	Natural radioactivity	30
1.5.2	Detection of gamma rays	31
1.5.3	γ ray analysis	34
2	Experiments in a small-scale wave flume	39
2.1	Experimental methods and procedure	40
2.1.1	Wave flume	40
2.1.2	Sand	42
2.1.3	Sampling and sample analysis	42
2.1.4	Experimental procedure	43
2.2	Results and discussion	44
2.2.1	Experimental results	44
2.2.2	Summary of the main results	52
2.2.3	Assessment of the sample analysis	53
2.3	A simplified model to calculate trajectories of sand grains	55
2.3.1	Assumptions and simplifications	56
2.3.2	Model description	60

2.3.3	Summary of the assumptions and simplifications	61
2.4	Assessment of the model	62
2.4.1	Model calculations	62
2.5	Conclusions	67
3	Experiments in a wave tunnel	71
3.1	Introduction	71
3.2	Experimental set-up	73
3.2.1	The Large Oscillating Wave Tunnel	73
3.2.2	The BGO detector system	75
3.2.3	Radiation levels	76
3.2.4	Sampling analysis	79
3.2.5	Sand	80
3.2.6	Transport rates	82
3.3	Thin layer experiment	87
3.3.1	Experimental conditions and procedures	87
3.3.2	Results and discussion	88
3.3.3	Conclusions	92
3.4	Thick layer experiments	94
3.4.1	Experimental conditions and procedures	94
3.4.2	Results of the measurements	95
3.4.3	Results of the sample analysis	100
3.4.4	Radiation intensity levels as function of density	104
3.4.5	Results of the transport calculations	105
3.4.6	Comparison with other studies and model calculations .	106
3.4.7	Conclusions	112
4	Measurements at the beach	115
4.1	Introduction	115
4.2	Measuring techniques and methods	117
4.2.1	Radiation Measurements	117
4.2.2	Elevation measurements	117
4.2.3	Empirical eigenfunction analysis	118
4.3	Test site ‘Bornrif’	121
4.3.1	Description of the site	121
4.3.2	Results and discussion	121
4.4	Test-site ‘Oerd’	124
4.4.1	Description of the site	124
4.4.2	Results	125
4.4.3	Time evolution of the EPs	130

4.4.4	Correlations	135
4.5	Conclusions	140
5	General discussion and conclusions	143
5.1	Introduction	143
5.2	General results	143
5.2.1	Heavy mineral placers	145
5.2.2	Modelling of sediment transport	148
5.2.3	Radiometric measurements	150
5.2.4	Seasonal behaviour	151
5.2.5	Conclusions	153
5.3	Outlook	154
A	Results of the wave flume experiments	157
B	Input parameters for transport models	161
C	Tables and figures belonging to chapter 4	163
	Bibliography	169
	Samenvatting	175
	Dankwoord	183
